Portfolio: <https://indyminhas.github.io/Indy-Portfolio/>

SUMMARY

Certified Full Stack Web Developer primarily focusing to utilize attained knowledge in web development/software testing areas. Effective at combining creativity and problem solving to develop mobile first user-friendly applications.

EDUCATION

Bootcamp Certificate (2020): University of Washington, Seattle, WA

- A 12-week intensive program focused on gaining technical programming skills.

Bachelor of Science Kinesiology (2016-2019): Washington State University, Pullman, WA

PROJECTS

drinkME | <https://github.com/indyminhas> | <https://derek-watson14.github.io/drinkME/>

- Developed front-end of the web application that will utilize the back-end JavaScript and APIs required for this application to work.
- Group project where we collaborated codes on GitHub.
- HTML, JavaScript, Materialize CSS, APIs (Google, Punk, Open Brewery, and CocktailDB)

DrawScope | <https://github.com/indyminhas> | <https://drawscope.herokuapp.com/login>

- An application that allows users to draw online in a fun, game environment. Users can sign up, create chat-drawing rooms, invite their friends, and compete for points by guessing each other's' illustrations.
- Group project using GitHub collaboration where I handled the Front-End Development and Design of the web application.
- Express-Session, Express-Handlebars, MySQL, bcrypt, express, express-session, Materialize CSS, MemoryStore, MySQL2, Sequelize, and Socket.io.

GuideMe | <https://github.com/indyminhas> | <https://guidemedimma.herokuapp.com/>

- An application that allows adventurers to host or attend adventures available near their location.
- Group project using GitHub collaboration where I handled the Front-End Development and Design of the web application.
- Express-Session, React, MySQL, bcrypt, express, express-session, Foundation CSS, MemoryStore, MongoDB with Mongoose, react calendar, clouinary, and Socket.io.
